## DETAILED ACTION

### *Election/Restrictions*

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-7, 10-14 and 18-22, drawn to a system/a method/a computer readable medium of detecting the psycho-physical state of a user based on the speech from the user, classified in class 704, subclass 270.
  - II. Claims 8-9, 15-17 and 23-24, drawn to a voice based information retrieval system, classified in class 704/707, subclass 270.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions of Group I and Group II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because voice based information retrieval does not required particulars of detecting psycho-physical state of user based on the speech from the user. The subcombination has separate utility such as detecting psycho-physical state of user based on the speech from the user and carryon a dialog based on the psycho-physical state of the user.

3. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.
4. A telephone call was made to Crystal D. Sayles on July 19, 2004 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
